MEMORANDUM FOR: Deputy Director for Administration

FROM: Bruce T. Johnson  
Director of Data Processing

SUBJECT: Professional Personnel Requirements for the  
Office of Data Processing

1. This memorandum is a follow-up to our earlier discussion concerning the near-term professional personnel requirements of the Office of Data Processing (ODP). Your approval below will confirm our agreement that ODP has your authorization to exceed our current professional strength by 20 positions. Although I spoke specifically about our need for applications programmers, we would also like to continue the recruitment of experienced systems programmers, who are actually harder to find.

2. We plan to allocate the grades of these positions in direct proportion to our current distribution of grades in our professional positions.

3. It is understood that this decision will need review if we are unsuccessful in obtaining the positions we are seeking in the 1983 budget.

/s/ Bruce T. Johnson

Bruce T. Johnson
